

File Edit View Run Kernel Settings Help

         Code 

```
[1]: def print_pyramid(n):  
      for i in range(n):  
          # Print leading spaces  
          spaces = ' ' * (n - i - 1)  
          # Print stars (2*i + 1 stars on the ith row)  
          stars = '*' * (2 * i + 1)  
          print(spaces + stars)  
      n = int(input("Enter number of rows: "))  
      print_pyramid(n)
```

Enter number of rows: 5

```
