

File Edit View Run Kernel Settings Help

         Code 

```
•[1]: import numpy as np
monthly_expenses = np.array([1200, 1100, 1150, 1300, 1250, 1400,
                             1500, 1350, 1250, 1450, 1600, 1700])

total_yearly_expense = np.sum(monthly_expenses)
print("Total Yearly Expense: $", total_yearly_expense)
```

Total Yearly Expense: \$ 16250
