

File Edit View Run Kernel Settings Help

         Code 

```
[1]: all_customers = {"John", "Mary", "Steve", "Ana"}
      returned_customers = {"Mary", "Ana"}
      non_returning_customers = all_customers - returned_customers
      print("Customers who bought but never returned:",
            non_returning_customers)
```

Customers who bought but never returned: {'Steve', 'John'}

```
[ ]:
```
