

File Edit View Run Kernel Settings Help

         Code 

[]:

```
•[6]: #Finding Insertion Index in Sorted Data
import numpy as np
prices = np.array([10, 20, 30, 50])
new_price = 25
insertion_index = np.searchsorted(prices, new_price)
print(f"The new price inserted at index: {insertion_index}")
```

The new price should be inserted at index: 2
