

File Edit View Run Kernel Settings Help

         Code 

```
•[1]: #program to check login credentials.  
def check_login(username, password):  
    if username == "admin" and password == "1234":  
        return "Login successful"  
    else:  
        return "Invalid credentials"  
username = input("Enter username: ")  
password = input("Enter password: ")  
print(check_login(username, password))
```

```
Enter username: admin  
Enter password: 1234  
Login successful
```

```
