Code

[1]:
```python
students = {
    "Suma": 85,
    "Abhi": 92,
    "Sandya": 78,
    "Divya": 90
}
name = input("Enter the student's name: ")
if name in students:
    print(f"{name}'s marks: {students[name]}")
else:
    print(f"Student '{name}' not found in the records.")
```

```
Enter the student's name:  Abhi
Abhi's marks: 92
```
