Code

```python
my_list = ["apple", "banana", "cherry", "date", "elderberry"]
try:
    index = int(input("Enter the index of the item you want to
    print(f"The item at index {index} is '{my_list[index]}'")
except IndexError:
    print("Error: That index is out of range.")
except ValueError:
    print("Error: Please enter a valid integer.")
```

```
Enter the index of the item you want to access:  5
Error: That index is out of range.
```
