Code

```python
sentence = "the sky is blue and the grass is green"
words = sentence.split()
seen = set()
has_duplicates = False
for word in words:
    if word in seen:
        has_duplicates = True
        break
    seen.add(word)
print("Has duplicates:", has_duplicates)
```

Has duplicates: True
